

Dear Parent / Guardian

From 2017, John Tonkin College is a Bring Your Own Device (BYOD) school. This means that students are encouraged to bring their own tablet device to school.

BYOD presents students with the ability to use a piece of technology that they own and are familiar with to actively engage and enhance their learning opportunities, in a 21<sup>st</sup> Century learning context.

More information about the 'device types' that fit our BYOD program and a copy of our 'Computer User Agreement policy' are attached with this letter. Please note that we encourage you to take out the appropriate level of insurance for the device as the school can take no responsibility for loss/damage.

Whilst it is highly recommended that each student has their own device, the school does have a small number of devices for use at school.

If you have any questions related to the program please contact the college on ph: 9583 7373 and request that call back from the technology coordinator – Ross de Hoog.

Yours sincerely

Kim Savins  
**Principal**
